## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, 23, and 24, drawn to a method of producing a package wrapper, classified in class 493, subclass 320.
- II. Claims 9-21 and 25, drawn to a method of producing a package wrapper, classified in class 493, subclass 322.
- III. Claim 22, drawn to a method of producing a package wrapper, classified in class 493, subclass 187.

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I and II and Group III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require to have that printing the package wrapper at the remote location at the selected package wrapper size. The subcombination has separate utility such as the step of printing the package wrapper at the remote location at the selected package wrapper size.

Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the

instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination require to have that the window which is movable relative to the image. The subcombination has separate utility such as the windowed image being located at the at least one predetermined location.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Ms. Susan Parulski on 4/1/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
